 - MP Marker Post
 - P Post
 - RS Road Sign
 - SC Stop Cuck
 - SV Stop/Suice Valve
 - WO Wash Out

- Notes
1. The co-ordinate system relates to the Ordnance Survey National Grid via Static RTK GPS Observations centred on EL3, with Scale Factor = 1.000.
 2. Levels refer to the current stations indicated on the drawing which relate to Ordnance Datum Newlyn via Static RTK GPS Observations.
 3. General north denoted by symbol.
 4. Levels along road side of kerb are channel levels, those on footpath side are top of kerb levels.
 5. Flatness heights are typical values only & true heights are approximate.
 6. Cover levels refer to cover centre.
 7. Invert levels refer to main flows.
 8. Generally only trees with a trunk diameter greater than 200mm 1.5m above ground level have been shown individually.
 9. Whilst reasonable effort has been made to identify tree species, we would advise these are checked by an arborist before development is carried out.
 10. Fence lines generally follow post centres unless stated otherwise.
 11. Due to the nature of this site no guarantee can be given that all detail is shown.
